

magnets for inspection tiled panels

A magnetic device for creation of a discrete tiled acces panel with four magnetic tabs placed on the corners. It is a universal application suitable for all types of tiles, ensuring a neat finish. Can be easily removed and replaced at all times.

INSTALLATION:

Determine on the wall the inspecting panel position and size. The panel sides should correspond to square modules of one or more tiles connected with a support base. Glue the 4 fixing plates on the wall covering tile rear side, along the inspecting panel opening. Make an access panel by fixing the four magnets with adhesive, one on each corner, on the single tile or tile-panel created previously, checking that they are well aligned with the plates on the wall. Make sure that the adhesive is completely dry before placing the inspection panel back on the wall. If necessary seal along the inspecting panel perimeter with silicon. This seal may subsequently be cut to allow removal of the panel.

MAGNETIC tabs for tile panel - wall inspection

Metal tabs with magnetic elements fixed to them. 4 tabs with magnets plus 4 perforated backing fixing plates.

Material: galvanised steel
