

Perforated plastic spacers for a regular and gauged grout joint tiling in wall and floor coverings. Realised in synthetic material resistant to chemical agents. Available in all the sizes normally required by tile joints. Their anti-floating shape is conceived to keep the spacer imbedded into the fresh grout during tiling and beating (from DIC 30 to DIC 100). Delivered in 500 pcs bags organized in dispenser displays.

DIC-DIT

Note: The spacers colours could be changed compared to those reported in the pictures

DIC/DIT spacers requirement scheme

Tile size (cm.):	60x60	60x30	40x40	40x30	40x20	33x33	30x30	30x20
Quantity for mq.:

Wedge DIS

Manufactured in polypropylene.

5 mm height. Helps to compensate possible screed level differences.

Material:	5	DIS 50
Polypropylene		

New 'Dispenser' boxes make it easier to take out cross and "T"-shaped spacers for tile laying.

The contents size is stamped on every plastic bag you pull out from the new front dispenser. This enables to have always an ordered warehouse of all sizes, helping the stock recovery, with the right size and the item code always at hand.

The boxes are superimposable and multiple of a pallet to optimise the transport and the stocking.

dispenser DIC-DIT

Frontal content size label for an immediate stock check.
